CASE REPORT FORM (PROFORMA)

DEMOGRAPHICS:

1. IP NO: 2.AGE: 3.SEX:

VITALS:

Temp: BP: PR: SPO2:

SOCIAL HISTORY:

1. SMOKING 2. ALCOHOL

PREVIOUS MEDICAL HISTORY:

1. Post COVID status 2. DM 3. HTN 4. CAD 5. CCF 6. PTCA

CHIEF COMPLAINTS:

S.NO	SYMPTOMS
1.	Chest Pain
2.	Dyspnea
3.	Palpitations
4.	Sweating
5.	Bipedal Edema
6.	Cough
7.	Fever
8.	Epigastric pain
9.	Vomiting
10.	Dyspepsia

CLINICAL PARAMETERS:

PARAMETERS	NORMAL LEVEL	ELEVATED LEVELS
Troponin- T		
CPK-MB		
CRP		
WBC count		
Neutrophils		
Lymphocytes		
Urea		
Serum Creatinine		
SGPT		
SGOT		
ALP		
HDL		
LDL		
TG		
TC		

TREATMENT:

- 1. Streptokinase
- 2. Antiplatelets
- 3. Anticoagulants
- 4. Nitrates
- 5. β Blockers
- 6. Statins
- 7. Antibiotics
- 8. Anti-Hypertensives
- 9. Anti-Diabetics

ANGIOGRAPHIC PROFILE:

- 1. STEMI
- 2. NSTEMI
- 3. 2D ECHO
- 4. CAG

SCALES:

SYNTAX SCORE: I

- 1) Left Dominance
- 2) Right Dominance

SYNTAX SCORE: II

PCI

SYNTAX Score II:

PCI 4 Year Mortality:

CABG

SYNTAX Score II:

CABG 4 Year Mortality:

TIMI RISK SCORE

On	ne point is given for each of the following:
	Being older than 65
	Using aspirin within the last week
	Having at least two angina episodes in the last 24 hours
	Having elevated serum cardiac biomarkers
	Having ST-segment deviation on an electrocardiogram (a type of heart test)
	Having known coronary artery disease
	Having at least three risk factors for heart disease, which include:
	High blood pressure (greater than 140/90)
	Smoking (being a current smoker)
	Low HDL cholesterol (less than 40 mg/dL)

The lowest score is 0, and the highest is 7.

☐ A family history of heart disease

☐ Diabetes

The chart includes possible scores and their corresponding risk percentages:

Score	Risk of heart event
0 to 1	4.7%
2	8.3%
3	13.2%
4	19.9%
5	26.2%
6 to 7	At least 40.9%
